- Wide Range of Materials & Colors
- Professional Installation Services
- Smart Automation Options Available

## Eyad Curtains & Home Decoration

We are offering precise control over light, privacy, energy efficiency, and mood. Our modern solutions are crafted to meet the demands of contemporary homes, commercial spaces, and luxury environments.

# Blackout Curtains

Blackout curtains are made from tightly woven, often multi layered fabrics that significantly reduce or completely block out external light. Some have a built-in liner for enhanced performance.

- **Light Blocking:**  
Can block up to 99–100% of sunlight and UV rays.
- **Privacy:**  
Offers complete privacy, ideal for bedrooms and private settings.

# | Sheers Curtains

Sheer curtains, often made from fabrics like voile, chiffon, or organza, are lightweight and semi-transparent window treatments. Their soft, flowing nature makes them ideal for layering and styling, creating an open, breezy atmosphere while subtly diffusing sunlight. Sheer curtains gently filter sunlight, bathing the room in a warm, ambient glow without harsh glares. This makes them ideal for living rooms, dining areas, and any space where you want to maintain brightness without sacrificing comfort.

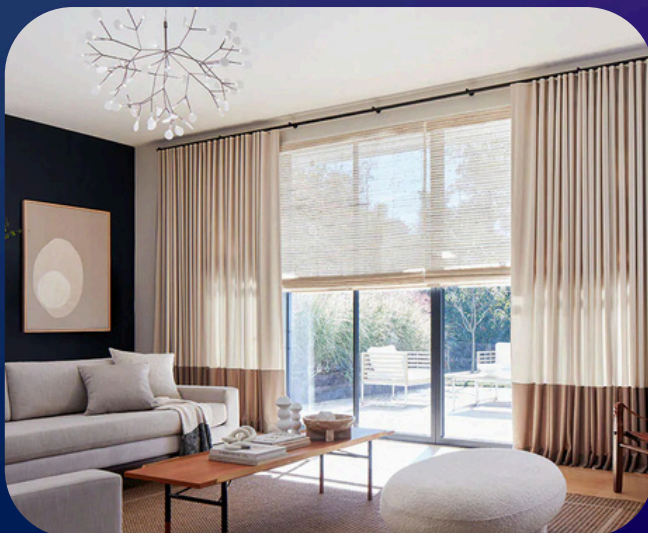

# Motorized Curtains

Motorized curtains are window treatments that open and close using a small electric motor, which can be controlled via remote control, smartphone app, wall switch, or integrated into a smart home automation system.

## Wavy Curtains
